

CAS Team Status

CS-455

4/10

What was accomplished?

- View modeling wireframes/concepts were created and merged onto the SDD document
- First iteration of data modeling finished and merged onto the SDD document
- Class modeling under senior review and planned on being merged 4/10
- Class modeling member methods created and will be merged 4/10
- View sequence chart created for reference during implementation
- First development milestone implementation issues created

What is being worked on?

- Polishing final touches on SDD for all modeling tasks (View, Data, and Class/Component)
- A full system component diagram is being developed
- Task management is working on deciding the best sequence of implementation
- Research on Wt::Auth, Wt::Dbo, and other related Wt libraries are being researched
- Preparing for first implementation sprint (4/10-4/17)

Roadblocks

- Lack of communication
- Time
