CS-455 Meeting Agenda

Date: 4/22
Time: 8:30 PM
Present: Aryaman, Chayton, Daivik, Ethan, Joseph, Rachel, Thomas, Victor, Zachary

<u>Review of Last Sprint</u>

- Review big decisions that were made
- Review feedback given by team members
- Review any big things that got finished

Team 1 Review

What did you get done?

What are you working on?

What are some roadblocks you have found?

Team 2 Review

What did you get done?

What are you working on?

What are some roadblocks you have found?

Team 3 Review

What did you get done?

What are you working on?

What are some roadblocks you have found?

Leadership/CM Review

What did you get done?

Joseph: Made revisions to issue #31 comment and created issues #58 and #59. I assigned both issues to myself and made comments accordingly.
Zach: Finished some reviews so people can start implementation. I also got some more of the DB done and started working on the universal CSS file.
Ethan: More reviews of issue descriptions, started Git branches of both implementations for when a second review of issues #51 and #38 are done.
Aryaman: Updated issue 30 based on feedback

What are you working on?

Joseph: Awaiting approval/revisions on all current issue comments so that I can act upon those accordingly.
Zach: I need to do a couple more reviews, get the DB done, and plan the backend implementation. I also need to take a second to be realistic about what we can get done for this project.
Ethan: Waiting on more issue comments for potential review, as well as researching different Wt functionality not covered in class for when I begin implementation.
Aryaman: waiting on approval on the issue and getting ready for my presentation tomorrow in 410W

What are some roadblocks you have found?

Joseph: Starting Complexity.
Zach: Time.
Ethan: Not having really coded in C++ in 3 semesters, figuring out Wt and modern C++ things
Aryaman: 410W

TO-DO

Class Assignments

Last reading quiz this Wednesday.
- Ch. 26 & 28, possibly Cloud slides

Project Assignments

- First round of implementation due this Wednesday. Let's plan to get testing done by Friday so we can try to get some backend development done ASAP.

Team Business

- We will not be able to finish this project, so we will choose what is best in terms of functionality for our final project.

Other

(Other information not covered)

Open Floor

Put your name and what you want to talk about

Next Meeting Time
