CS-455 Meeting Agenda

Date: 4/29
Time: 8:30 PM

Review of Last Sprint

- Review big decisions that were made
  - Nothing yet. New milestones will be made to give us structure to what our next week and a half will look like
- Review feedback given by team members
  - None
- Review any big things that got finished
  - Some views got finished and some got approved.

Team 1 Review

What did you get done?

What are you working on?

What are some roadblocks you have found?

Team 2 Review

What did you get done?

#32 Forgot Password - waiting on pull request
#33 Profile Settings - meeting afterwards

What are you working on?

#26 User Authentication - in progress; meeting tomorrow
#46 Display Records - in progress; meeting afterwards

What are some roadblocks you have found?

Possible git issue, DB questions
- Meeting afterwards

Team 3 Review

What did you get done?

- ...

What are you working on?

- Continuing view development

What are some roadblocks you have found?

- Other classes

Leadership/CM Review

What did you get done?

- Joseph: Finished initial look of Admin Dashboard view.
- Zach: Finished some view testing, sent the DB out for testing (Thomas is testing it right now and we are meeting later on to talk about some issues).
- Aryaman: Worked on the faculty dashboard view.
- Ethan: Finished initial working view of addStudentView.

What are you working on?

- Zach: Finishing DB testing issues and working on making some backend Gitea tasks. I will also be working on page linking within the application. Finally, I will be working on a plan for the next week to see what we can get working with the project.
- Joseph: interior page links for Admin Dashboard and those page views
- Aryaman: Working on fixing some errors and adding styling on the view
- Ethan: Testing current things that are out, and working on bulk BoardView

What are some roadblocks you have found?

- Zach: Time, moving, wt
- Joseph: wt, moving
- Aryaman : lack of practice in c++ and wt
- Ethan: Wt, time

TO-DO

Class Assignments

- Status report

Project Assignments

- There are still many views to be developed. If you have finished a view and are ready for a new one, go into Gitea and assign yourself to one. Compare with the software design document to see the functionality of the view if you are unsure about it.
- Project is due May 7th??

Team Business

- **Zach:** There are still some members who have not forked the project. I'm not sure what that is about, but it seems so exhaustive to try to keep telling people to simply fork the repo. If you don't have it forked, it's proof that there is no work getting done. I will be reaching out to everyone who has been inactive once again to get statuses. Please reach out with questions!
- **Ethan**: There is no need to change main.cpp when testing your programs. If your code structure is properly fixed like petShop was (and mine and Chayton's for example), for views you will simply create .cpp and .h files, and add an internal pathing link in casApp.cpp
